ORIGINAL POETRY.

THE CHILD OF POVERTY. see, advance you pensive form, Keen sorrow dwells upon his brow; No garments neat his limbs adoru, But tatters rudely round him flow : His timid voice in pitcous tone, Steals gently on the passing ear, And while he makes his sorrow known, His cheeks receive the falling tear; Stranger, ask not who this may be, It is the Child of Poverty.

With timid pulse his bosom beats, As lowly to the earth he bends-And fancies in each gaze he meets, A look where soften'd pity blends: But no-ah! view what pale despair Now circles round his youthful brow; He Ands but indignation there, And not a ray of mercy glow,-For soon the stranger turns, you see, And scorns the Child of Poverty.

See night approach, in all its dread, The trembling boy no shelter finds, The earth receives his weary head, And horror o'er his slumber reigns : Spurn'd, and unknown, his youthful form Sinks 'neath the sullen shades of even, Exposed to many a reckless storm That shake the darken'd vaults of Heaven; And bids their bursting power to free The hapless Child of Poverty.

Now shrinking from the hollow blast, His weary limbs no longer brave Those storms, or scenes of sorrow past, He sinks a victim to the grave: Low down beneath the silent turf, His bosom rests from all its woes: Freed from the poignant cares of earth, Is villow'd now in sweet repose : Yet stranger, once this child like thee, Wasnot the Child of Poverty. Gav wealth, in giddy torrents poured

Around his home of stately mein; Gay circles join'd the festive board, And Friends in glittering crowds were seen; The gilded halls then rang with joy, The parents loud their doatings prove, They clasp'd, they bless'd their smiling boy, The emblem of their wedded love; Nor did they dream that form would be, The trembling Child of Poverty. But Fate approached with chilly hand,

And burst the joyous bands of mirth; One parent died in foreign land, The other drooped to native earth: No more the revel laugh was beard To sound along the gilded halls,-Their wealth, by ruthless hand secured, The structure soon to ruin falls, And leaves the beauteous boy you see, The Child of Woe, and Poverty.

Sourn'd now by all, the lovely youth Was taught the rudest fate to bear, And while he breathed his mouroful truth, Too few would deign to lend an ear: The dark ning clouds of sullen grief Stole from his cheek its peaceful bloom. And Death, with kindred, kind relief, Soon swept his victim to the tomb; And not a friend now mourns for thec, Sweet injur'd Son of Poverty.

Yet the' no stately marble rears To tell where now thy relies lay,-Thy turf, in vernal bloom appears In memory to thy dark decay ; And oft some minstrel's harp shall tell, While wandering near thy hallow'd spot, How soon thy guileless bosom fell To earth, unnoticed, and torgot: And sound a requiem to thee, Departed Son of Poverty.

THE MORALIST.

When the world begins to recede from our view, and the realities of eternity are just ready to burst upon us, we begin to form some just estimate of the consolations of religion, and some rational, though imperfect conceptions of the value of the soul and the importance of its salvation. But while the storms of adversity slumber, and death appears to be lingering on the borders of distant years, and we are cheered with the sunshine of health and prosperity, we are apt to place at a remote distance those momentous things which concern us as dying creatures, and " put far away the evil day," which often comes suddenly upon us. The distant sound of alarm just interrupts our slumbers; dies away upon the ear, and we imagine all is wellwe turn our heads upon the soft pillow and sink again to repose. But as the cry approaches with increasing loudness, and the constant peals of the alarm-bell strike upon the ear, and the bursting flame dazzles our slumbering eyes, we wake-start up-forsake our slumbers, and rush forth to secure our own safety, and aid in rescuing others from impending danger. The most zealous and devoted, who have accustomed themselves to meditate much on the scenes of death, and the concerns of a future world, when they come to view the subject near, and to look at them in the light of eternity, find that they have had very imperfect conceptions of their magnitude and importance. They then feel that all their labours and exertions have been but weak attempts, and they are astonished that they have so long slumbered over perishing souls. With what carnestness do we see many on a dying bed, urging Christians to greater faithfulness, and pleading with impenitent sinners to become reconciled to God, and prepare for the day of retribution.

What allowances it may please God to make for the prejudices, and passions, the slights and blasphemies of unthinking careless men, who have never embraced the faith of Jesus, it may not perhaps concern us to enquire; but we know that we are responsible to that law which we profess, and to that Master whom we serve; that to us treason; that wilful unrepented sin in a Christian is without hope as without excuse, and

Dr. Franklin, in a letter to Dr. Mather, says, The last time I saw your father was in 1724. On taking my leave, he showed me a shorter way out of the house, through a narrow passage, which was crossed by a beam over head. We were still talking as I withdrew, he accompanying me behind, and I turning towards did not understand him, till I felt my head hit against the beam. He was a man who never missed an occasion of giving instruction, and upon this he said to me, " you are young, and have the world before you-STOOP as you go through it, and you will miss many hard thumps." This advice, thus beat into my head, has frequently been of use to me; and I often think of it when I see pride mortified, and misfortunes brought upon people by thus carrying their heads too high."

Lord! let no unreasonable stiffness of those who are in the right, no perverse obstinacy of those that are in the wrong, hinder the closing of our wounds, but let the one instruct in meekness, and be thou pleased to give to the other repentance, to the acknowledgment of the truth. To this end, do thou, O Lord, mollify all exasperated minds; take off all animosities and prejudices, contempt and heartburnings; and, by uniting their hearts, prepare for the reconciling of their opinions; and that nothing may intercept the clear sight of thy truth, Lord, let all private and secular designs be totally laid aside, that gain may no longer be the measure of our godliness, but that the one great and common concernment of truth and peace may be unanimously and vigopously pursued. And do thou so guide and prosper all pacific endeavors, that these happy primitive days may, at length revert, wherein vice was the only heresy.

condition of Kentucky," published in the

Richmond Enquirer, says:

"The ladies in Kentucky are in general larger in stature than in your state. Springing, as it were, from a richer soil, their persons indicate a regular, well proportioned, and more healthful growth; they are large enough to be stately, without being awkward: their symmetry is more the gift of nature than of art and fashion: their features are in general regular and handsome, without being beau-tiful, and are well adapted to convey the im-pression of an improved mind. Their de-portments are in general dignified, evincing exalted virtues, yet gracefully condescending, easy, candid, and unaffected. Accustomed to social intercourse, and a frequent introduction to strangers, they are at once affable, receive a gentleman as a friend, and a stran. | friends."

"In general, their minds are stored with substantial and useful knowledge, and in many instances embellished with the fashionable accomplishments. Cheerful in disposition, their conversation is seasonably lively and interesting; the follies and foibles of the sex, and the beauties of a beau, or the fashions of a dress, vield to more rational and edifying subjects of conversation. The ladies of Kentucky possess all that is useful belonging to their sex in any state, but they are destitute of the engaging softness of the southern, and attractive beauty of the northern ladies. 1 Tom. met, however, with a few individuals of the sex who possessed every thing that was ne-

On the west end of Martha's vineyard there are indications of subterraneous fires. The Indians used to say, that before the coming of the Europeans to this continent, there resided a Deity, whose name was Mansnon, and that he used to step out upon the rocks that run into the sea, and take up a whale and broil it for his dinner on coals : and that sometimes he used to invite the Indians to eat the relicks of his meal, and that they, for his very great kindness, agreed to give him all the tobacco that grew on the island in one year, which was scarcely enough to fill his great pipe, - that he smoked it out, turned the shes into the sea, which formed the Island of Nantucket. Discoveries in the Moon .- Our renders arc already aware that the learned Moon-shee Professor Gruithanseu, of Munich, has discovered castles, not in the air, but in the moon, and inhabitants of course. The learned professor is pursuing his researches, and, it would seem, with no ordinary success, for he has been able to distinguish, not merely cultivated from uncultivated parts, but even arable and meadow land, and to lay down the precise places where regetation and animals are to be seen. One of his first discoveries was a large fortification; he has since improved much upon this, and has ascertained that a star redoubt is attached it was a young female who had thrown down to it "dedicated to religious purposes." The the small oar which she had been using, and next inquiry was to ascertain of what persuasion the moonrakers are, and this he has ascertained-" they worship the stars, and consider the earth as a natural clock," constructed, of course, on that great desideratum with its inhabitant, the perpetual motion.

The third day after my leaving the high road, was an exceeding warm one. I slung my gun listlessly over my shoulder, and sauntered carelessly along, whilst my constant companion, a favourite dog, came panting behind me. The mountain which I had commenced descending in the morning, was studded, or rather composed, of huge masses of Rock, that rendered much care necessary to secure my safe progress. There was just current enough setting down the creek to enable the boat to move slowly along, and as it floated by, it passed close to the shore, a few yards beneath the rock on which I reclined. I gazed on the fair adventurer, whom I had thus unexpectedly met, with no small degree of interest. She was a brunette, I supposed of about twenty. She did not possess regular beauty, but then there was that certain something in her countenance-an amability and force of expression that almost supplied the place of it .-Her hair was jet black, and hung in graceful stature, she was rather beneath the midscarce ever penetrated-where solitude seemed undisturbed to reign, apparently far remote from any village or dwelling, to find a person of such an appearance as she whom I gazed after-to discover her in so romantic a manner, almost overwhelmed me with astonishment, and I came very near assigning her the rank of the genius of the stream .-Presently she laid the bird down in the boat, her little oar splashed in the water, and she soon disappeared amongst projecting rocks and shadowing trees. As she went, I again heard the sound of her voice, and ere it was lost, I distinguished these lines.

To all appearance, he was as much surprised at the apparition of a stranger as I had been but a short time before. When we entered into conversation, I knew at once that he had been bred somewhat better than the generality of persons we might expect to meet under similar circumstances. Seated on a log, we idled away an hour in chatting, 'till he closed our parlance by inviting me to the house, where I felt quite anxious to be, for he told me we should meet his daughter, the fair damsel of the stream. I staid all night at the house, and was agreeably entertained, for might have been, I made a show of departing, but my entertainer would not listen to it, so I was even forced to stay, much to my saportion of the immediate vicinity, which afforded some new specimens to my already cumbersome collection of minerals, and in the evening amused Ellen by a sketch of the romantic appearance she had presented the day before. all sat down to chat together, I soon found the sound came from up the creek, and I how it was between Ellen and him, and as I thought I could hear at the same time, the was going to bed her father whispered in my Next morning, before breakfast, I walked the following words of Burns, sung in an towards the mill-dam, where I met the captain, for such was the familiar title of Ellen's intended husband, who had staid with us all night. We took a stroll along the creek together, and before we returned, his open heart had let me into many of its secretsthere was something of a military appearance that I had remarked about him at first, which, added to his title, induced me to venture a remark of a military nature. My companion here seemed quite at home, and he soon told me that he had served his country in the pose cast my eye towards the bend in the army during the last war. He now kept a store in the village, and had just returned from an absence of some weeks down the river, having made his stay as short as possible, for Ellen had promised him her hand on his returning. He told me that they had fixed the wedding for that night, and that he expected a party of friends during the day from the village, which was about eight miles off; that I should assist at the ouplials, he considered a matter of course, and as I made no objections, it was so fixed. At breakfast, Ellen smiled and blushed, and when I joked her before the captain, put coffee into the cream-jug, which gave our meal quite a merry character. About 9 o'clock, we heard a great noise of shouting and singing on the creek, which betokened the approach of the bridal party, and we all ran out to had them, and witness their arrivalthey filled three boats, lads and lasses, all blythe and gay, every one with a jovful heart and a smiling face, and their boats flew swiftly o'er the water, as though right well pleased with their duties. When they came to, they saluted us with three cheers, and we did all we could to answer them. Then they sprang out of their boats, and gave us al manner of greetings; there was one man in the company I shall never forget, for nature had made him expressly for a merry man, and placed his commission in his face, which was like a half moon, lit up by its natural rubicund appearance, and two little twinkling eyes. In honor of the occasion, he had mounted a pair of calico breeches, which gave him a wonderfully queer look, for in form he appeared as though composed of heterogenous portions, the lower one being evidently designed for a smaller man than the upper; be this as it may, he seemed the factorum of the company, and skipped or waddled about (for I can't exactly determine which) to the no small satisfaction of his companions. As we turned to go towards the house, one of the village damsels discovered that she had left something in the boat, and away flow the knight of the calico breeches to its recovery-a minute afterwards I heard a plunge, and the girls screamed out "La! Humphrey's in the water!" I looked, but Humphrey was gone : presently, however, his scarlet phiz became visible, emerging from the transparent element, and giving no bad idea of the sun rising at sea. "He's been to catch fish for the captain," said one. "No, its a loon hunt he's on," said another. "No. ther the one nor the other, Mr. Wiseacre," cried he, " but I tell you what, we're on hard my share of cold water, all at once, so I've nothing now to do but bouse the pure spiwe waited for now was the minister, without whom we could not get on in the business of Hymen, although Humphrey affirmed, that before a dozen witnesses he could do the job as snugly and legally as the parson. But the captain did not seem inclined to profit by merely for the sake of having his good offices brought into requisition-and, by the bye, I thought, from certain indications which I observed, that his hearers were not much averse, to at least a portion of his proposals. I had forgotten to tell of the change he had made in his habilaments; for, on coming to the house, it was insisted that he should put on dry clothes, so we had a good laugh when he re-entered the room, for, from Humphrey's peculiar formation, it was a hundred chances to one against the garments of any other person fitting him, and now he bolted in amongst the company, crammed into a pair of pantaloons as much too luxuriant in length as they were wanting in breadth; the first defect he had, however, was remedied by rolling them up to his ancles; but for his coat, there was no remedy; how he had got into it, the Lord only knows; for it lacked a wide space of meeting before, and the skirts kept at a most

Echo before had certainly been roused from her evening's nap, but she now seemed wide awake, and answered jovially from her most secret recesses, and the noisy chorus was heard ringing through the valley and up the sides of the hills. But I have said enough of our voyage to the village; for if I were only to tell of the songs sung, queer stories told, and jokes cracked by the busy Humphrey, it would keep a long time, without saying a word of the others, none of whom were silent. When we got to the village, we found all its houses (about half a dozen in number) illuminated in honor of the wedding. We straightway proceeded to the captain's dwelling, and here commenced another scene of banqueting and festivity; the neighbours, far and near, were assembled, and all manner of comforting cheer was prepared by the thoughtful mother of the bridegroom. The table was loaded with a profusion of good things, and excellent currant wine sparkled in every glass .-'Tis true that, unlike the time when "the great King Arthur made a sumptuous feast," we had not exactly

How the greater part of the night passed, requires no great stretch of imagination to divine; every plan and prank that could be thought of, by a set of merry souls, for promoting fun and hilarity, was put into execution. I never saw a happier time. staid a few days with the captain and his interesting bride, and was present at several agreeable parties, given in honor of this western wedding," to which I had so unexpectedly become a guest. After that, I bade adieu to all my kind entertainers, and the numerous blooming damsels with whom I had formed acquaintance; and promising to come and see them all, should I ever be again in that part of the country, with a head full of sailing nymphs, and merry meetings, and a knapsack crammed with bride-cake, I pursued my journey.

His third, and probably his last, enterprise, was the picking Mr. Jackson's pocket in the Theatre. After conviction, he stated "that he did not himself pick Mr. Jackson's pocket, though he was concerned with the gang, but that he had in his life picked pockets enough to slate the largest roof in New-York."

The Milledgeville Recorder of May 3, announces the distressing intelligence of the murder of the Indian Chief, General William M'Intosh, and the Chief of Cowetan, Tustunsuggee Tomme, the news of which was brought to the Governor of Georgia, by Chilly M'Intosh, the General's son, and five chiefs of the nation, who made their escape from the massacre. The mischief was perpetrated by a large body of Indians, supposed to be four hundred, who attacked Gen. M'Intosh in his a command, free from the conti own house, on the very day he had appointed to set off at the head of a mission, to explore the country west of the Mississippi, for the future residence of the nation. It is added, that there is too much reason to fear that white men were the instigators of this horrid butchery.

Robert Douglass was executed at Bath, Steuben county, N. Y. on the 1st inst. agreeably to the sentence passed upon him for the murder of Samuel H. Ives. He was too feeble to ascend the scaffold without assistance, and oon after sunk down almost helpless. During the religious exercises he was much affected and often called on God for mercy. No man ever met his fate with greater reluctance .-He made no confession at any time after he received the sentence of death, and left the public totally ignorant of the place of his nativity, and who are his relatives. He was about 24 years of age.

Captain Luddington, of the sloop James Monroe, arrived at Charleston, S. C. from Neuvitas and Nassau, N. P. states that the schr. Planter, Capt. Eldridge, which sailed from New York, for Neuvitas, on the 15th February last, was fallen in with about the 10th March, off Neuvitas, by a piratical boat rigged schooner, mounting 5 guns-who took possession of her, and run to leeward of Neuvitas-where it is related they murdered the captain and all hands. The above pirate is upposed to be the vessel captured by the U. S. steam galliot Sea Gull, and the boats of H. B. M. Frigate Dartmouth-goods having the first. It is very striking at the first very been found on board, known to have been The subject is well expressed. The group shipped in the Planter. Captain L. also states that a boat from Matanzas had arrived at Neuvitas, a short time previous to his sailing, who reported that she had been fallen in with by the Colombian privateer, schooner Revenge, Captain Bedford, who took out her cargo, consisting of Beeswax, and allowed them to proceed. The captain of the boat stated, that while in company with the Revenge, he saw an American cruiser send her boats on board of the schr. Planter, then lying commanding the boats, went on board the Planter, when one of the pirates, supposed to commission -- upon which the Lieutenant shot him through the head.

Last Sunday afternoon, near the site of the new penitentiary, the horses of a Dearborn, in which four persons were riding, took fright, be taken. The money is so well executed as and before their speed could be checked, one to be considered genuine. The information of the reins suddenly gave way, and the cartillerists, and Mr. John C. The deceased was observed struggling and endeavoring to regain the stage. Some men on Sims's wharf, perceiving this, ran to the spot, when but one of the lads was to be seen. Mr. Pascal Hollingsworth, merchant, an aged gentleman, plunged into the water twice in search of the missing one, but without success. The body was recovered a short time afterwards, but every attempt to resuscitate it, by the use of claim a niche for my bust in the temple which the Humane Society's apparatus, and other means, proved abortive.

On Monday, a respectable gentleman drov his horse and gig to Spruce street, where he got out, and went into the house of a friend forestall my merits by supposing that whom he had gone to visit. On the seat of the gig was a bank book and some other papers, over which was thrown a great coat .-On taking leave of his friend and opening the &c. were gone. Upon inquiry, it was asceradopted: a description of the horse and gig was sent to all the bridges and outlets of the city. In the evening, Mr. Muirhead, of Bank st. having rode out to Bush Hill, and being acquainted with the horse and gig, had the good fortune to see them. Three boys were in the Gig. They were all brought to the city and taken before an Alderman. The two elder boys, say 12 or 14 years of age. were bound over as witnesses-the younger boy, say nine years old, was committed. He is a little lame, had been observed for two or three days, lurking about the house in Spruce street, and seen sitting on the step of the house just before the gig was driven away .-He had offered to sell the horse and gig for 100 dollars, and the great coat for one dollar : -said it was his father's, but that the weather was now getting warm, and he did not want it. The other two boys, it was believed, were taken up by the younger boy, to give them a ride. The parents of the older boys were found, but the younger boy told different and contradictory stories, and his parents have not vet been discovered

THE HUBARD GALLERY. Here, with strange mysterious hand, HUBARD waves his fairy wand, At whose bidding forth there comes, Chapels-spires, and princely domes; At whose wink the forests rise, Castles-hills and plains, and skies; Horsemen fierce on fiery steeds. Rushing on where glory bleeds: Hunters streaming o'er their grounds, Leaping-plunging-horse and bounds, Borne with wild impetuous speed, O'er mountain, dale, and flowery mead. Hero-prince-or curious lout, Here parade from life cut out, Graceful shapes and comic forms, And every scene that fancy warms; Here where bucks and dandies dash, " Drunk with frolic, fun and flash," And display their pompous strutting, In all the pride of paper cutting : Cut from life while cutting capers, To furnish themes for cutting papers. Music floats melodious here, Stealing through the brilliant air : Beauty's eye, in musing trance, See with steps of joy advance; See those forms enraptur'd move, Looks but made for light and love; Smiling youth and age severe, All in gathering crowds appear, And stroll delighted through the maze, Where bright the Steel of genius plays. But see where in his chair of state. With piercing eye and brow sedate,

The magic master of the scene, Sways his sceptre bright and keen; And show'rs around with careless hand, The forms that come at his command. Hither! hither! then repair, You that love the strange and rare, Where genius hath its mantle cast, But soon may be forever past. Here, where true in every part, That strikes the eye or thrills the heart, Life and nature brightly glow, With ebon charms on beds of snow, And sport in simple black and white, Expressive of their new delight.

THE EGYPTIAN MUMMY

He EGITTAN MUMM!

If as just arrived in this City, and will be exhibited a short time at the Pennsylvania Museum, Marketstreet, a few doors above 8th street.

CERTIFICATE.

New-York, August 1, 1824.

Sir,—When you first announced to me the arrival of a human Mummy, from Egypt, I made an overture immediately for its particular and careful examination. At that time, the body was entirely covered by the cloth and bandages of embalming. These were opened in the presence of the most respectable witnesses, at the College of Physicians; and the disclosures afforded satisfactory evidence of genuineness.—My attending friends, rege of Physicians; and the disclosures afforded satisfac-tory evidence of genuineness.—My attending friends, and myself, were highly gratified by the fair opportunity we enjoyed of inspecting such a curious piece of antiqui-ty;—and if I was to express an opinion to my fellow cl-tizens, it would be in the form of an exhortation, for them to view this rare and real product on, without de-lay.

A CURIOSITY.

A MR. GIBBS, Lettery B oker, of this city, has been recently exhibiting in this state a curious piece of mechanism, said to be the work of an Italian artise. It consists of a box \$1.2 inches long, \$1.4 wide, and \$1.6 deep—of fine gold. (in one end is a snuf box—on the other, a lid open and discloses an eight day time piece, which, besides steiking the hours and quarters, plays a number of beautiful runss. But the most wonderful partis, that on setting a aping, a picture on the app of the box rises alowly, and discovers a bird ascending from below. The bird is about an inch in le gth; of plumage the most rich, and yet the most natural. It sines with astenishing sweetness, and accompanies its voice with all those morions common to a hving bird—it head turns from side to side—its little bill opens a d its throat swells at every note, and its wings and tail agreed and contract during its sone. After finishing and repeating its strain, it drops upon its golden nest, descends to its retreat, and the lid gently closes to its place.

For the Good of the AFFLICTED. Anderson's Cough Drops

AND PECTORAL POWDERS, As prepared by JAMES MELLEN of Hudson, are known by many thousands who have tried them in the United States and in Canada, to be one of the best Medicines in use, for Coughs, Asthmas and Pains about the Breast, and other affections of the lungs leading to Consumption; a very fewdoses will often, if used in season, allay the irritation and effect a cure, if high fever influences in the lungs leading to the lungs and the pains and effect a cure, if high fever influences in the lungs and the public large and the lungs are in the lungs and the lungs are in the lungs are and the lungs are large. son, any time tritain and an accommodate the public, they are sold in Fifty Cents and One Dollar vial, and have the words "Prepared by I. Mellen," stamped on them, and I. Mellen, in writing, signed at the bottom of each printed direction, and no other medicine is entitled to the Certificates of Moses Kimball, Christopher tled to the Certificates of Moses Kimbali, Christopher Cook, or Stephen Seaman, notwithstanding some person has taken the liberty to apply them to what he calls Anderson's Cough Drops, signed D. E. Smith, offered by S. Potter & Co. but the public may consider it a deception to profit by, as all those cures were performed by the Cough Drops prepared by I. Mellen, And as a further proof of the efficacy of said Mellen's Cough Drops, which are called Anderson's, in New-York, and the Eastern States, the following certificates are added:

NEW CERTIFICATES.

NEW CERTIFICATES.

I Hereby Certify, That for more than a year previous to 1821, I was afflicted with a troublesome and alarming cough, which rendered me unable to labor or even to walk many rods without causing profuse sweating, and after trying many things without relief, I obtained a vial of Anderson's Cough Droper prepared by I, Melen, from the use of which I soon found great relief, so as to be able to resume and continue my usual labor, and I have regon to believe that the use of them was the means of saving my life, as I had but little hopes of recovering again when I commenced taking them; and I think them undoubtedly the best medicine in use for complaints of the lungs.

Having made use of Anderson's Cough Drops in my family, and hiving been requested to express my opinion.

lungs.

Having made use of Anderson's Cough Drops in my family, and having been requested to express my opinion of their efficacy in the cure of coughs, I herely certify, that a daughter of mine was severely afflicted with a cough for about a year previous to the summer of 1820, during which time she was more or less attended by several physicians; but, appearing to obtain no relief, her life was despaired of. Being informed of the great cures effected by Anderson's Cough Drops, I was induced to make use of a bottle, and in the course of one week only sho was greatly relieved of her complaints. After using two bottles she entirely recovered, and now enjoys as good health as ever. From my own experience therefore, I have no hesitation in recommending these drops to the public.

Haverhill, (Mass.) August 11, 1821.

This is to certify, that I, the subscriber, have been afficted with the Asthma for 20 years, and the paroxysma were often so violent as nearly to deprive me of breath. During one of the most violent returns of the Asthma I was advised to try Anderson's Cough Drops, as prepared by I. Mellen, and I did so, and to my surprise, I was very soon entirely relieved, and felt no more of it for six months. Upon a return of the paroxysm of the Asthma I have made use of the same medicine, and it has univaliably given me telief. As it respects the asthma, and its attendant symptoms, difficulty of breathing, &c.. I consider Anderson's Cough Drops a remedy, in paraise of which too much cannot be said. I further certify, that my son-in-law had for some time been supposed to he past recovery of a Consumptive complaint, when I are vised him to make a trial of Anderson's Cough brops, end from the use of them, he has so far recovered his health as to be again able to attend to his business.

> FOR THE SATURDAY EVENING POST. ACROSTIC.

Long may he live, enjoying health and peace, A nation's gratitude, with competence,— Favour'd by heaven, may ev'ry trouble cease, And may he feel all joys of soul and sense; Yet come it must—ah! be the day far hence, Ere it be said his mortal sun is set :

Then this to him, the blessed consequence, That while with tears a nation's eyes are wet, Enraptur'd angels meet and welcome La Fay-ette. OLD FARMER.

FOR THE SATURDAY EVENING POST. Mesars. Editors:-Beneath is a riddle not half a day old,

If worth while to guess it, pray let it be told. April 22d. 1825. I traverse the ocean, I'm seen on the shore,

I wander the deserts, where fierce lions roar; I strut like a dandy, where fashions the ton, Yet the gray headed sage has adopt'd me his own; I sat by the lover when far from his dear. The night he assur'd her his love was sincere; The weary has sought me, where hardships

By such was I found to their comfort and ease. I kept a strict watch to a minute of old. And once was a symbol of good things foretold. I vie with the eagle for swiftness in flight, And with her I repose in the shades of the night. So now gentle reader, to find out my name, You've a whole week to try, 'till the Post come again.

A Riddle .- A friend and an enemy, a blessing and a curse, serves life and takes it away, is long and short, round and square, smooth and uneven, strait and crooked, hard and soft, hot and cold, most wanted when its in the greatest plenty, accommodates itself to all tastes, sweet and of a bad smell, strong and weak, sometimes able to carry great burdens, at others will not bear a pin. For this men make long journeys though they have it at home, is full of reflection, has the art to dissolve matrimony, causes famine and plenty, has the privilege to kiss the fairest lady, is subservient and overbearing, death and a medicine, fluid and solid, a mountain and valley, has a numerous offspring yet an enemy to children, the subject of miracles, a theme for poets, an improver of music, and has occasioned the fairest architecture in the world.

A nobleman observing one day at dinner a person eminent for his philosophical talents intent on choosing the delicac es of the table. said to him, " What! do you philosophers love dainties?" " Why not ?" returned the other; " do you think, my Lord, that the good things of this world were only made for blockheads?"

It is said that the late Chief Baron Thomp-son was a very facetions companion over the bottle, which he much enjoyed. At one of the Judge's dinners during the Assizes, there was present among the party a certain Dignitary of the Church. When the cloth was removed, "I always think," said the Very Reverend Guest, "I always think, my Lord, that a certain quantity of wine does a man no harm after a good dinner !"-" Oh no, Sir !-by no means,"-replied the Chief Baron .- "it is the uncertain quantity that does all the mischief!"

At a meeting of the Philadelphia Society for promoting Agriculture, among the communications read was the following : A letter from Major S. Long, giving a de-

scription of the Rocky Mountain Goat, a notice of their geographical range, and principal place of resort. The information detailed was given by Mr. Donald M'Kenzie, of the British Hudson Bay Company, with whom Major Long met on his late journey to St. Peter's River, at the mouth of Assinibion river, and afterwards confirmed by Mr. Henry, of the same company, at Fort William, on Lake Superior; both these gentlemen spoke from per-sonal observation. The fleeces of these native animals, one of which is in Peale's Museum, exceed in downy softness, that of the Thibet goat, and their introduction into the United States would add greatly to the national wealth. France has already been repaid by working up the fleeces of the Thibet animal imported a few years since, for the expense attending that memorable expedition.

SWAIM'S PANACEA. THIS valuable Medicine has obtained a distinction which its efficacy alone can support. As a purifier of the blood it has no parallel. It is the most useful spring and autumn alterative ever known. All those who are affected with Scrofula, Leproxy, Scurvy, or cutaneous Eruptions, or any of those melancholy diseases arising from impurity of the blood and juices—also, those who suffer by diseased Liver, Rheumatte affections, or from indiscretion of their youth, or those whose constitutions are broken down by mercurial, antimonial, or arsenical medicines, should submit to a course of Swaim's Panacea. The effect of this Medicine is such as not to interrupt either business or pleasure, and or Swaim's Panacea. The effect of this Medicine is such as not to interrupt either business or pleasure, and requires only the common restraints of moderation in diet. It is conveyed by the circulating fluids, and corrects their tendencies to all those diseases which originate in vitiated blood. It is a safe, though a powerful substitute for mercury, and removes those evils which an unsuccessfuluse of that mineral so often occasions, &c.

In all complicated cases of Scrofula and Syphilis, and where the Syphilitic Virus of the parent causes a de-velopment of Scrofula in the child, this is the only rewhere the syphilitic virus of the patent clause a development of Scrofula in the child, this is the only remedy upon which a single hope of recovery can be reasonably founded; there has been no instance of its failure, when properly used. It imparts vigour to the whole system while the cure is going on—an operation rolong looked for in vain by the medical world; at the same time the patient is enabled totakenourishing food, which under the common modes of practice, is usually withheld from the sufferer. In many instances where the horrible ravages of ulceration had laid bare ligament and bone, and where, to all appearance, no human means but amputation could have saved life; in cases extreme as even here described, have patients been snatched from the grave and restored to good health, and the devouring disease completely eradicated. The discovery of a remedy like this now ofered for sale has been a desideratum from time immemorial.

The Proprietor does not suppose his bare assertion will convince: he will therefore give references to such as have been cured, and those under his care, among whom are many highly respectable citizens, that shall

as have been cured, and those under ins care, among whom are many highly respectable citizens, that shall satisfy the most incredulous of its superior efficacy in the disorders for which it is here recommended. Every member of society should aid in diffusing information of this discovery—humanity alone makes it a duty. CERTIFICATES.

CAUTION TO PURCHASERS.

The great demand and wonderful success of this mediine, has induced a number of persons to imitate it in arious ways. Some are selling Sarsaparilla and other yrups, imposing them on the ignorant for the Panacea; there are mixing the genuine medicine with molastic selling sarsaparilla and other problem. others are mixing the genuine medicine with molasses, &c. making three bottles out of one—thus retaining some of its virtues. These imitations and adulterations have, in many instances, protracted the sufferings of patients, in cases where the genuine medicine would have proved instantly efficacious.—I therefore deem it a duty I owe the public, to acquaint them, that it is impossible, from the very nature of its constituents, to be discovered by chemical analysis; and consequents. discovered by chemical analysis; and, consequently that all other mixtures represented to be mine, and sold as such, are fraudulent and base impositions, calculated dicine has my signature on a label, representing Hercu-les and the Hydra, and my name on the seal.

Price \$3 per bottle, or \$30 per dozen. Communications, post paid, and orders from any part of the world, will receive immediate attention. OF Printed Directions accompany the Medicine.

DYSPEPSIA.

DR. MEAD'S PILLS have been proved by that infallible test of truth, experience, the most effectual medicine ever offered in any country, for the cure of all those deranged states of the digestive organs, denominated Dyspessia or Indigestive organs, denominated Dyspessia or Indigestion, which frequently makes its appearance in the most complicated forms, such as loss of appetite, sickness at the stomach, and sometimes vomiting; belching up of water, which is sometimes tasteless, but most comwater, which is sometimes tasteless, but most commonly sour; gnawing pain in the stomach, heart-burn, costiveness, paleness of the countenance; languor, lowness of the spirits, palpitation of the heart, vertigo, and disturbed sleep. The number of these symptoms varies in different patients, by some being felt only in parts, while others have additional ones, equally disagreeable, such as severe pains in the head and breast, flatulence, emaciation, or wasting of the whole body, with great weakness, particularly of the legs. These pills will most effectually remove all sourness of the stomach, not merely by neutralizing the acid, but by correcting that morbid state of the secretions which give rise to it; and at the same secretions which give rise to it; and at the same the acid, but by correcting that morbid state of the secretions which give rise to it; and at the same time will restore to the debilitated organs of digestion, that tone and vigour which is absolutely necessary to the well-being of the animal economy. The best proof of their efficacy is, that they are prescribed by many of the first physicians, and used by the most intelligent families throughout the union.

(Sold by THATCHER & THOMPSON, and by SMITH & PEARSALL, Market street, Philadelphia; WILLIAM BUTLER, Market street, Baltimore; and by most of the Druggists throughout the Union. Price 81 per box. ap 23-3m
